LAB RECORD

Insurance Claim Request Form - Advanced Fields

Detail	
Name	THARUNIKKA A
Register Number	240701564
Course / Section	B E CSE
Platform	Zoho Creator
Application	Insurance Claim Request & Processing Management
Assignment	Assignment 04 - Advanced Fields

1. Aim

To extend the Claim_Request_Form with the Advanced Fields of Zoho Creator, so that the form supports policy verification through a Lookup, witness capture through a SubForm, file and media upload, an automatic claim reference number, a computed net payable amount, and a QR code for claim tracking.

2. Procedure

2.1 Creating the master Policies form

1. Created a new form named Policies with the fields Policy Number, Coverage Type, Sum Insured, Validity and Deductible.
2. Added a few sample policy records (for example POL-2024-778812, Comprehensive) to be used by the Lookup field.

2.2 Adding the Advanced Fields to Claim_Request_Form

Section	Field name	Field type	Setting
E	Policy_Details_Lookup	Lookup	Linked to the Policies form
E	Damage_Photo	Image	JPG/PNG, max 2 MB
E	Repair_Estimate_Upload	File Upload	PDF/JPG/PNG, max 5 MB
E	Policy_Sum_Insured_Lakhs	Decimal	Sum insured in lakhs
F	Witness_Details	SubForm	Name, contact, statement; max 4 rows
F	FIR_Copy_Online_Link	URL	Link to online FIR copy
F	Accident_Scene_Video	Video	Optional; 60 sec / 50 MB
F	Incident_Voice_Statement	Audio	Optional
G	Is_Third_Party_Involved	Decision Box	Mandatory
G	Estimated_Repair_Cost	Currency	INR, non-negative
G	Depreciation_Percent	Percent	Range 0 to 50
G	Net_Payable_Amount	Formula	Read-only; Repair Cost - (Repair Cost x Depreciation %) - Policy_Deductible

Section	Field name	Field type	Setting
H	Claim_Process_Guidelines_Display	Rich Text	Read-only guideline block
H	Claimant_Digital_Signature	Signature	Mandatory
H	Claim_Submitted_On	Date-Time	Captured automatically on submit
H	Claim_Reference_ID	Auto Number	Prefix INS-CLM-, year, 6-digit sequence
H	Claim_Tracking_QR_Code	QR/Barcode	Generated from Claim_Reference_ID

2.3 Configuration steps

1. Linked Policy_Details_Lookup to the Policies form so that staff select a policy instead of typing it, and mapped the coverage type, sum insured and validity values.
2. Added Witness_Details as a SubForm with Witness Name, Contact Number and Statement, limiting it to four rows.
3. Set the type and size limits for Damage_Photo and Repair_Estimate_Upload, and the duration/size limits for Accident_Scene_Video, where Zoho allows them.
4. Set the 0 to 50 range on Depreciation_Percent and the non-negative rule on Estimated_Repair_Cost.
5. Wrote the formula for Net_Payable_Amount using the deductible taken from the selected policy, and kept the field read-only.
6. Configured Claim_Reference_ID as an Auto Number field and linked Claim_Tracking_QR_Code to it.
7. Made Is_Third_Party_Involved and Claimant_Digital_Signature mandatory.
8. Submitted sample records from the form preview and checked the report.

3. Output

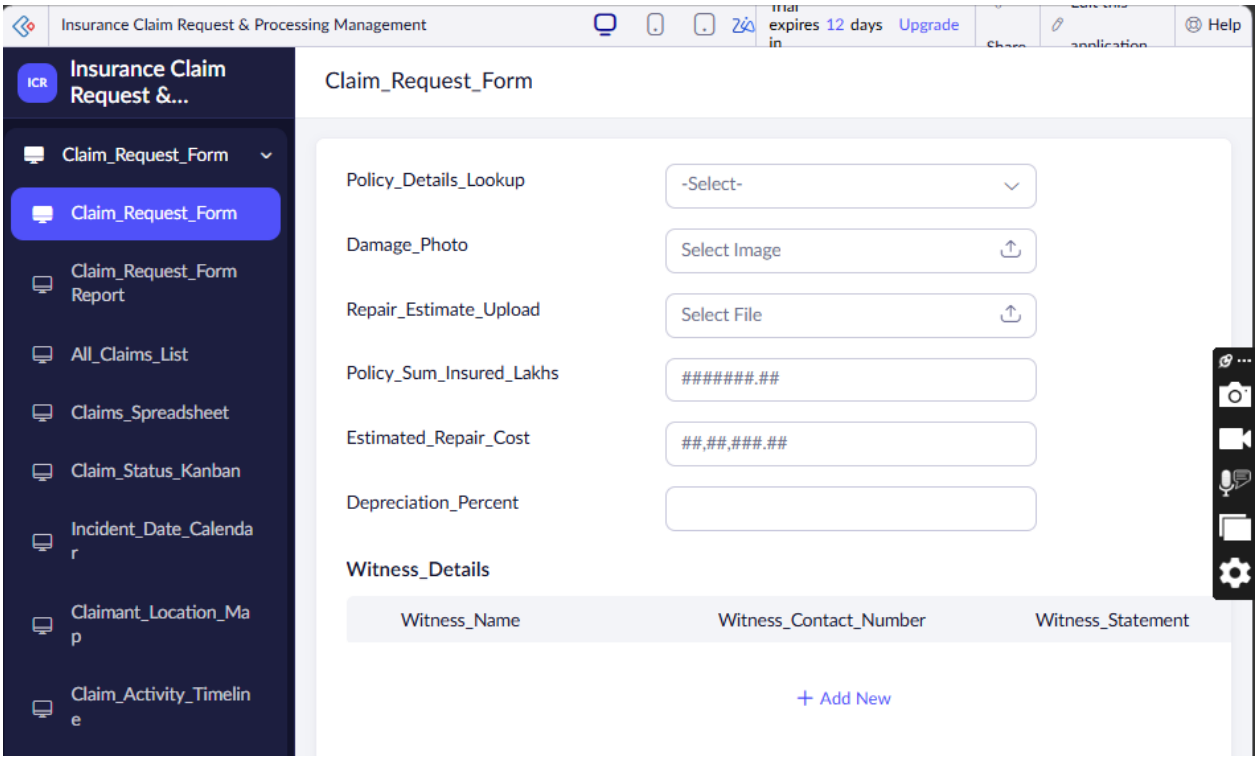

Figure 1: Form Builder with all Advanced Fields (Sections E and F)

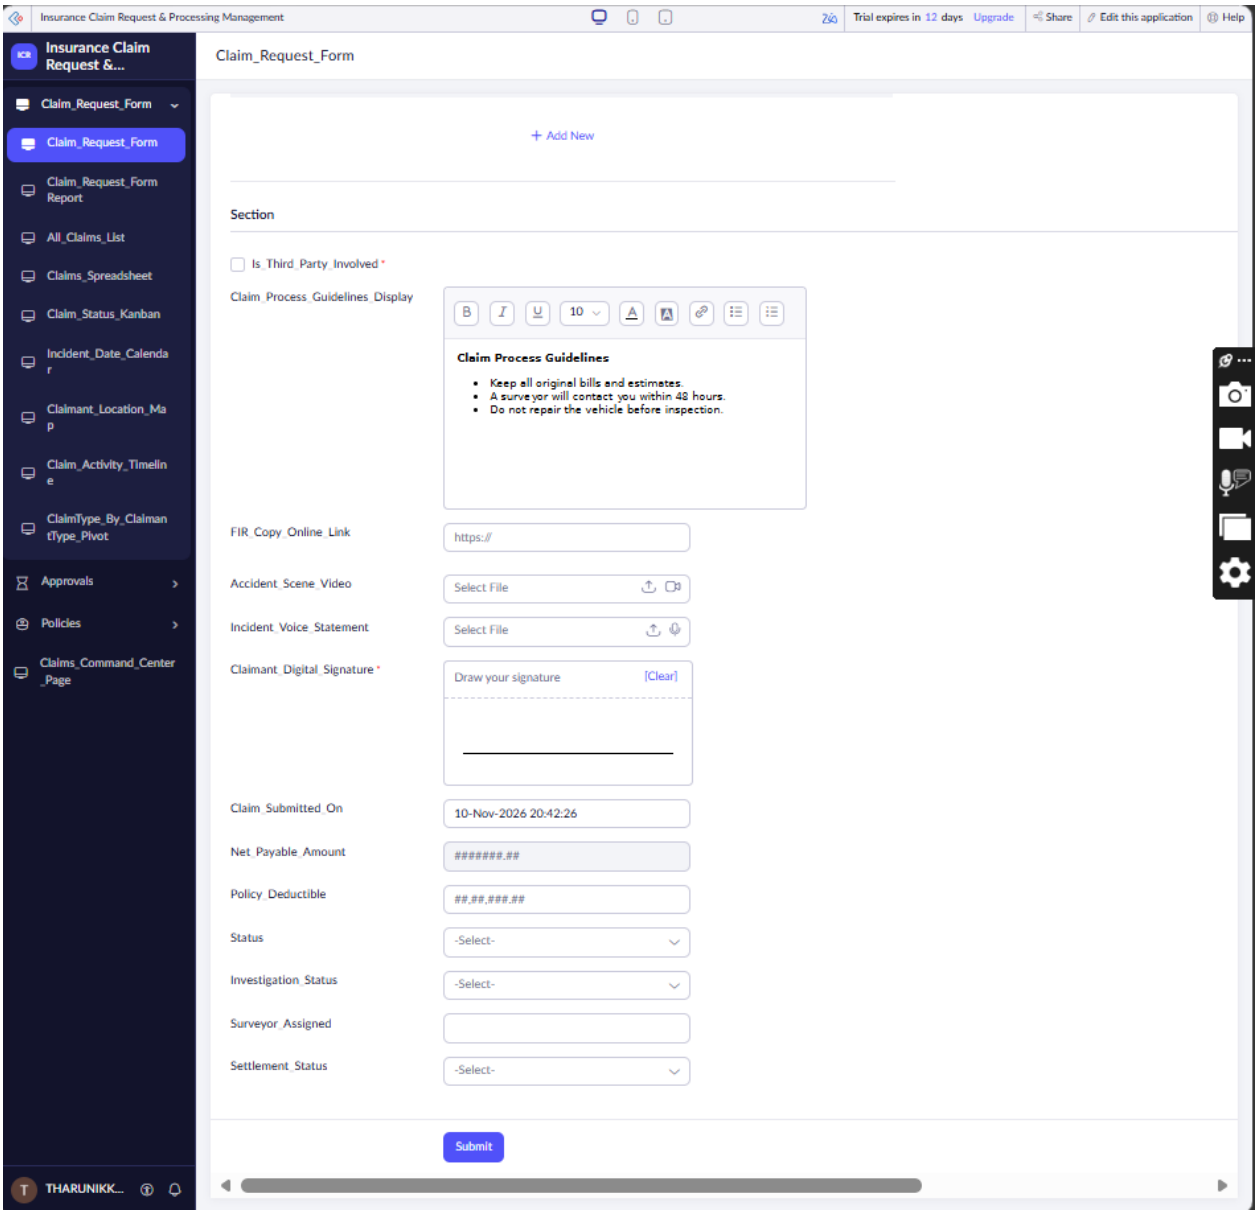

Figure 2: Form Builder with all Advanced Fields (Sections G and H)

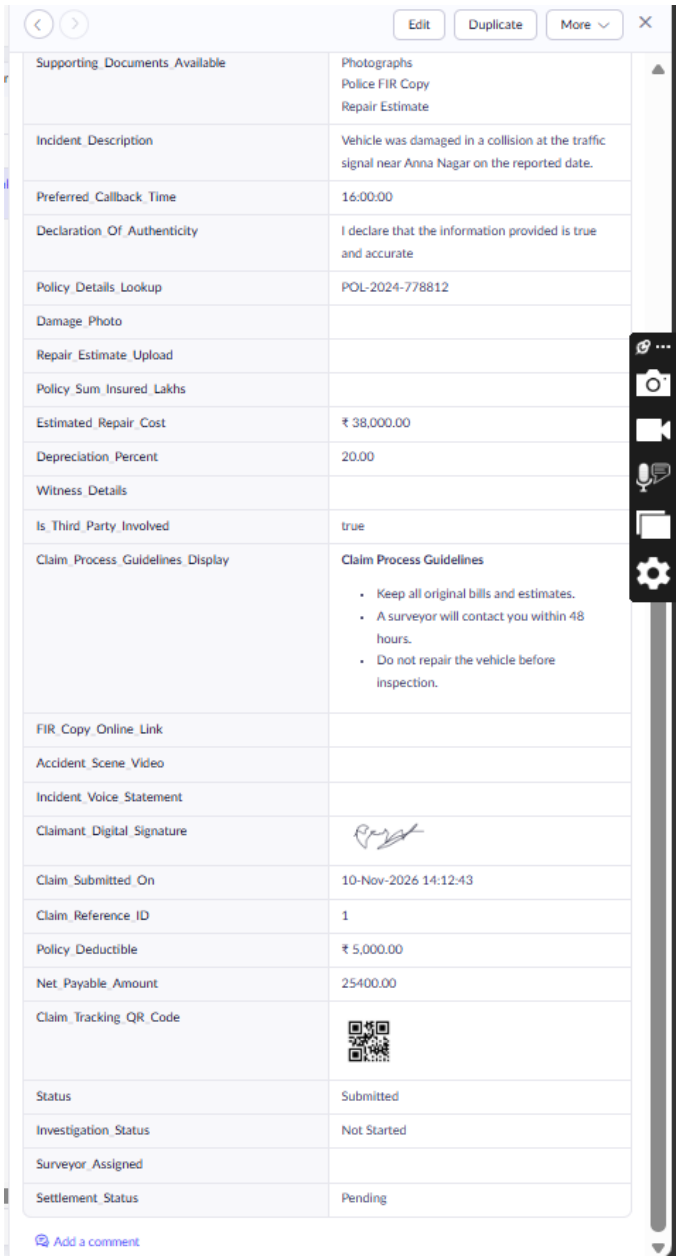

Figure 3: Live preview showing the SubForm and Net_Payable_Amount

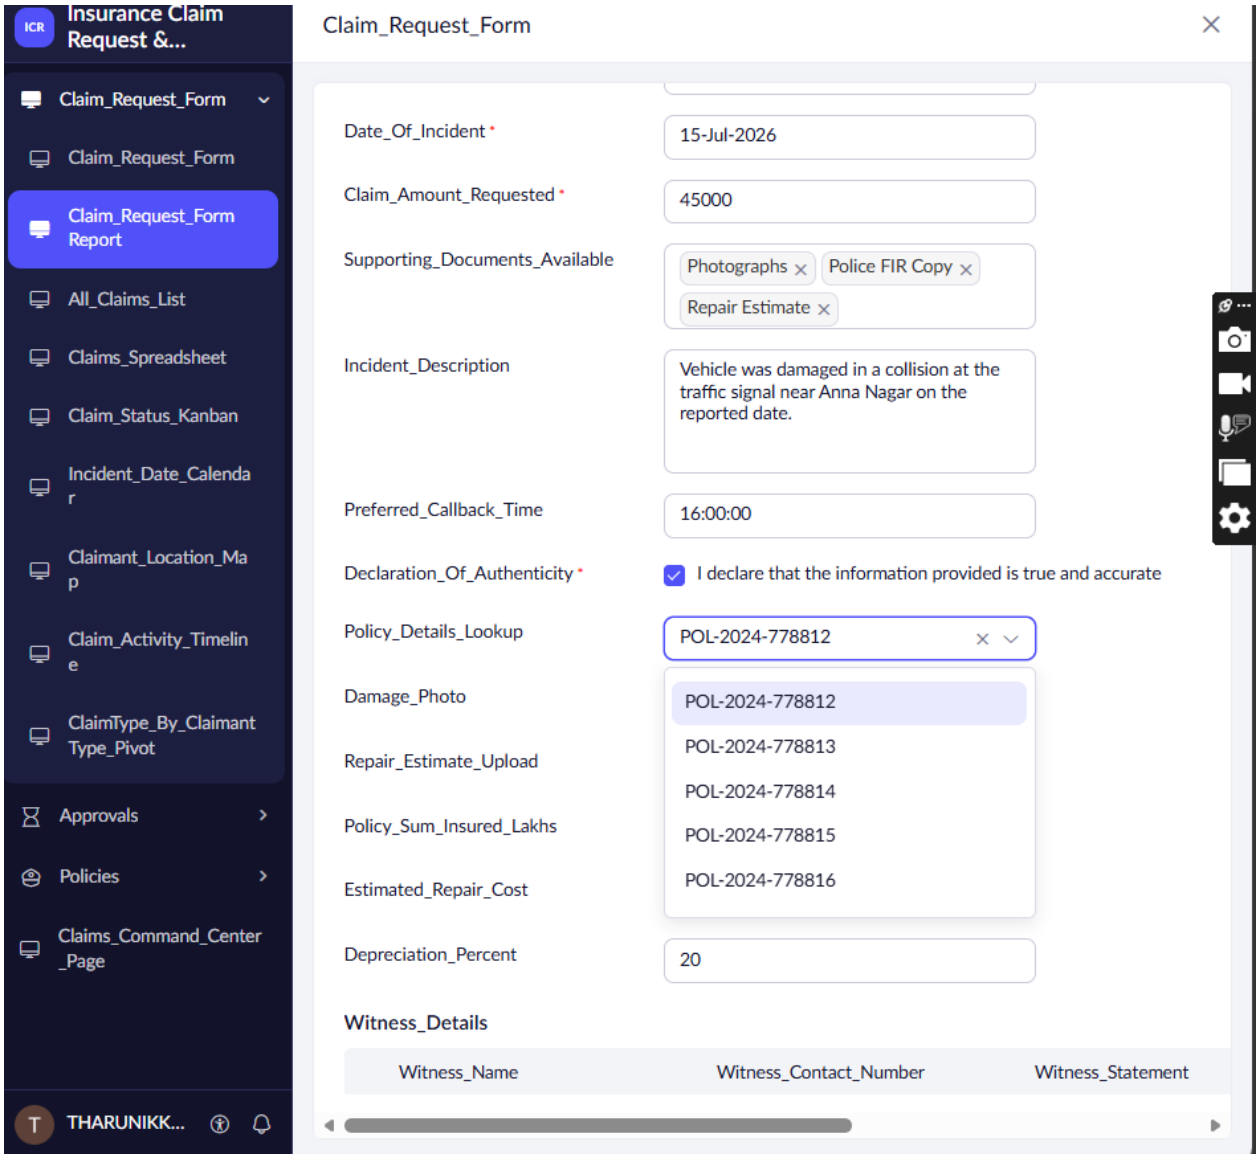

Figure 4: Policy_Details_Lookup in action (selecting a policy)

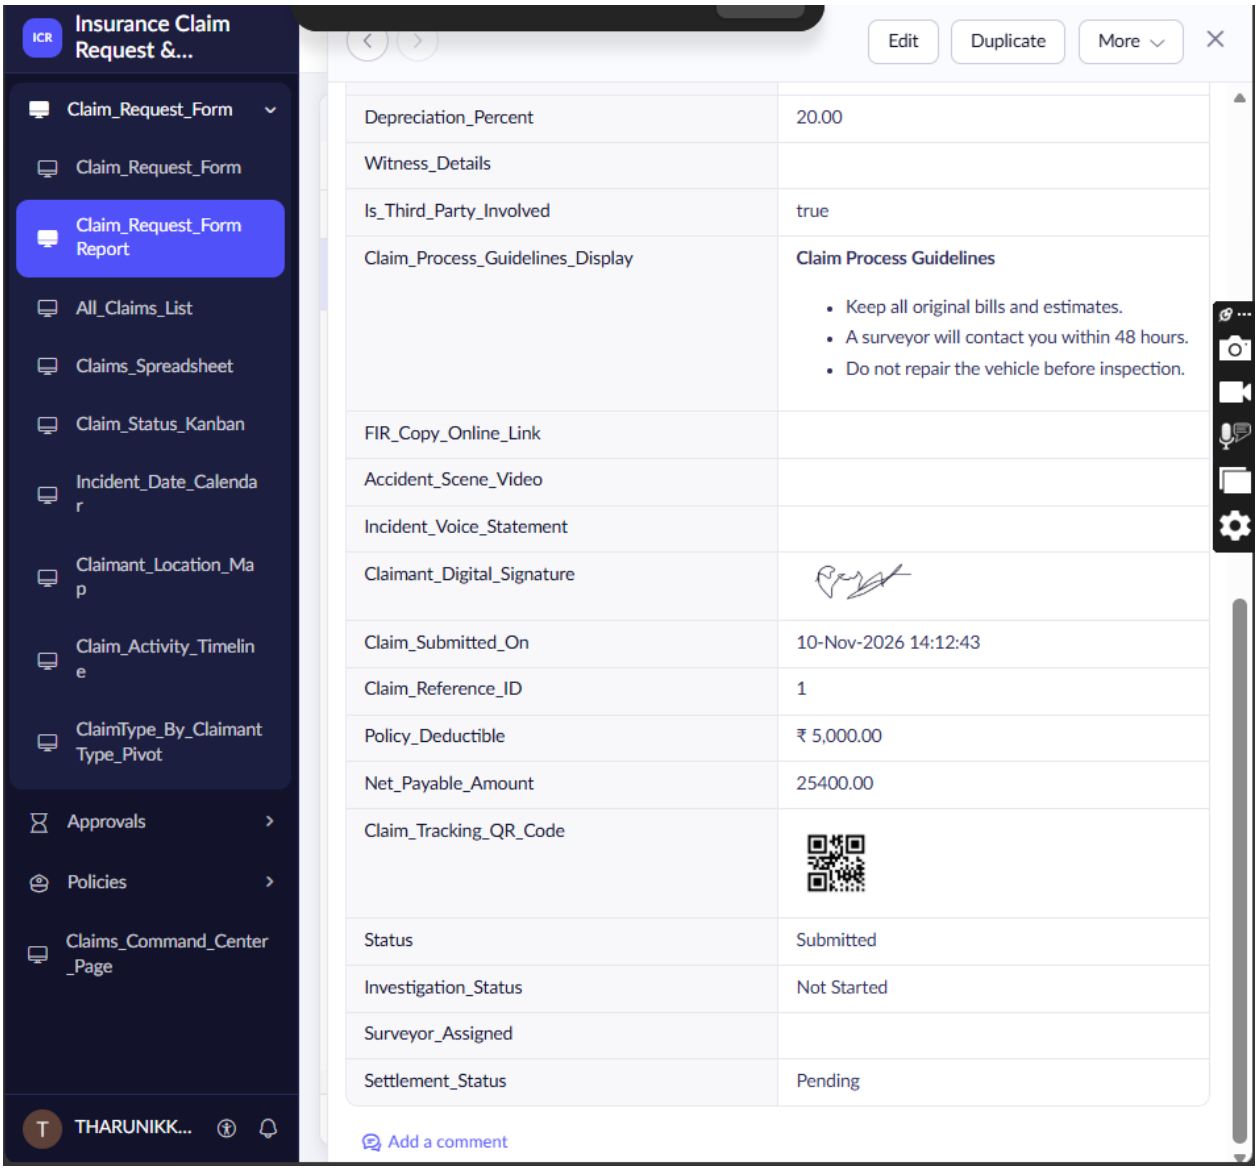

Figure 5: Claim_Request_Report showing two or more records with Claim_Reference_ID and QR code

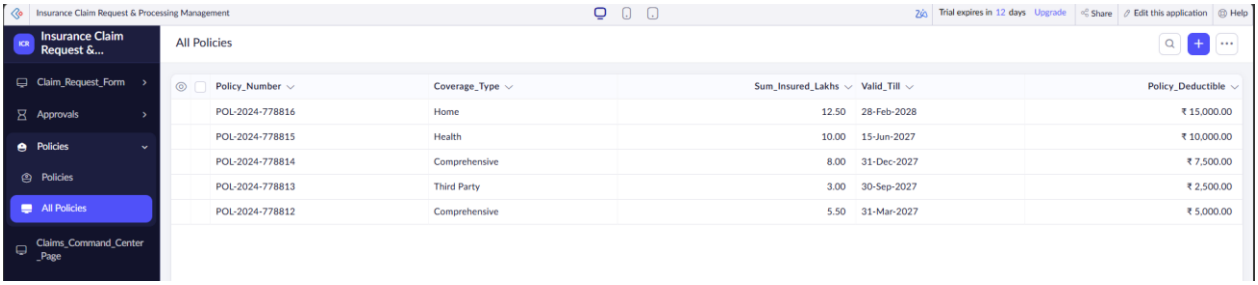

Figure 6: Policies master form with sample records

4. Result

The Claim_Request_Form was extended with the Advanced Fields in Sections E to H. The Lookup, SubForm, Formula, Auto Number and QR/Barcode fields work together, and the report shows the claim reference ID and QR code for the submitted sample records.
