LAB RECORD

Insurance Claim Command Center - Page Elements

Detail	
Name	THARUNIKKA A
Register Number	240701564
Course / Section	B E CSE
Platform	Zoho Creator
Application	Insurance Claim Request & Processing Management
Assignment	Assignment 04 - Page Elements

1. Aim

To build the Claims_Command_Center_Page in Zoho Creator using the Page Builder elements - Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets and Viewer - so that the claims team has one workspace to monitor, search and act on claims.

2. Procedure

2.1 Preparing the data

1. Checked that Claim_Request_Form has the Status field (Submitted, Under Investigation, Approved, Settled, Rejected) and entered three sample claim records.
2. Used the same Status values for the Kanban report and for the Board on the page so that they stay in sync.

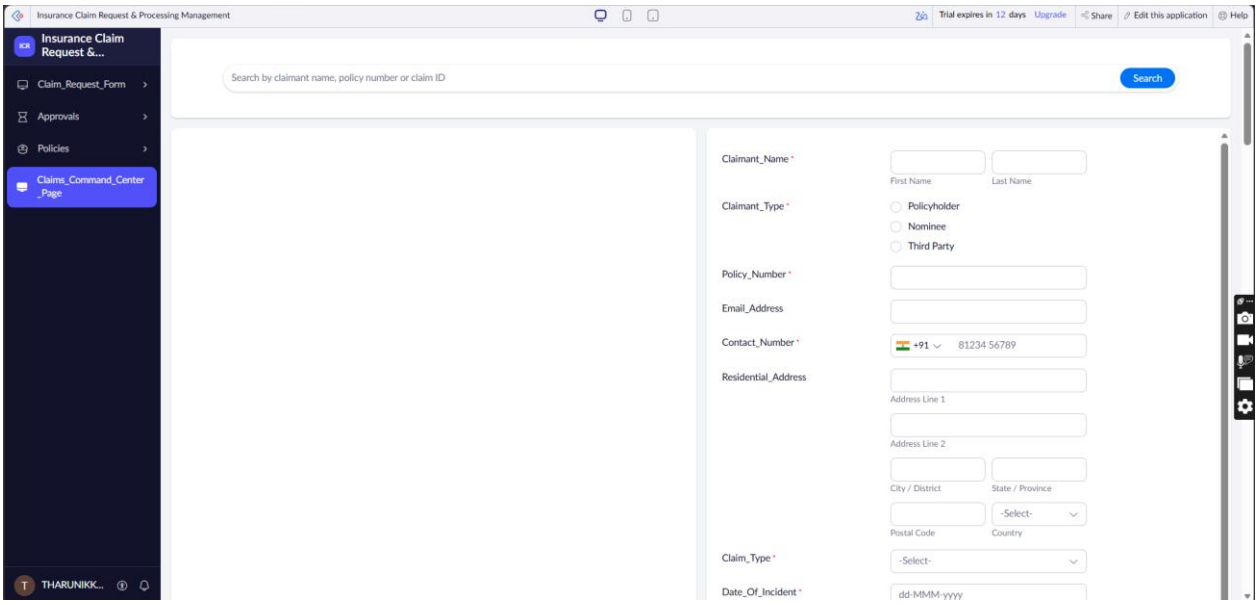

2.2 Creating the page and adding the elements

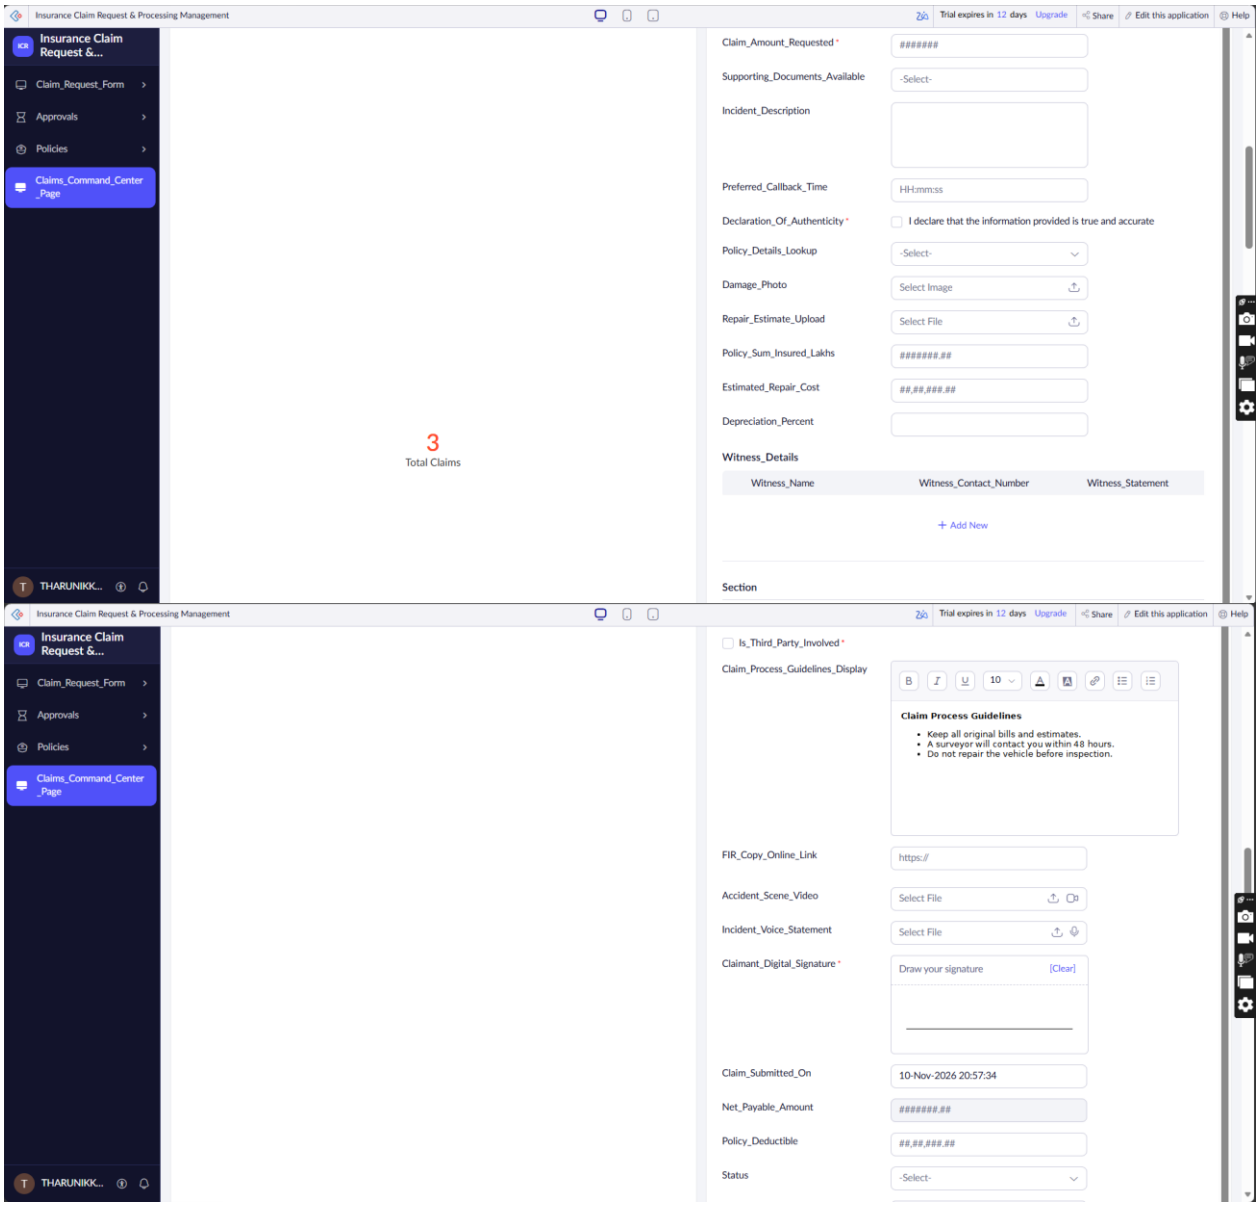

Element	Name / use on the page	Setting
Panel	Command_Center_Main_Panel	Used as a card showing the total number of claims from Claim_Request_Form
Board	Claim_Status_Board	Grouped by Status, aggregate Count
Chart	ClaimType_Distribution_Chart_Widget	Pie chart of Claim_Type by Count
Gauge	Monthly_Settlement_Target_Gauge	Count of records with Status = Settled, maximum value 10
Search	Claim_Search_Bar	Target report Claim_Request_Report; search criteria: [list the fields you kept]
Form	Quick_Counter_Claim_Intake_Form	Embeds Claim_Request_Form
Report	Full_Claims_Report	Embeds the claim report with all records
Snippets	Claim_Process_Guidelines_Snippet	HTML snippet with claim process steps and required documents
Button	Send_Document_Reminder_Button	Placed above the Claim Status Board
Viewer / Widgets	Claim_Document_Viewer, Surveyor_And_Reserve_Widgets	[Write whether you built these or not]

2.3 Steps

1. Created a new page from Pages > New Page and named it Claims_Command_Center_Page.
2. Added the Panel first, renamed it Command_Center_Main_Panel, and set it to show the Count of claims.
3. Added the Gauge, Chart and Search at the top, and configured each from Claim_Request_Form.
4. Added the Button above the Board, then the Board grouped by Status.
5. Added the Report below the Board and the Snippet and Form at the side.
6. Opened the live page, checked the Chart, Board counts and Gauge, and tested the Search with a policy number.

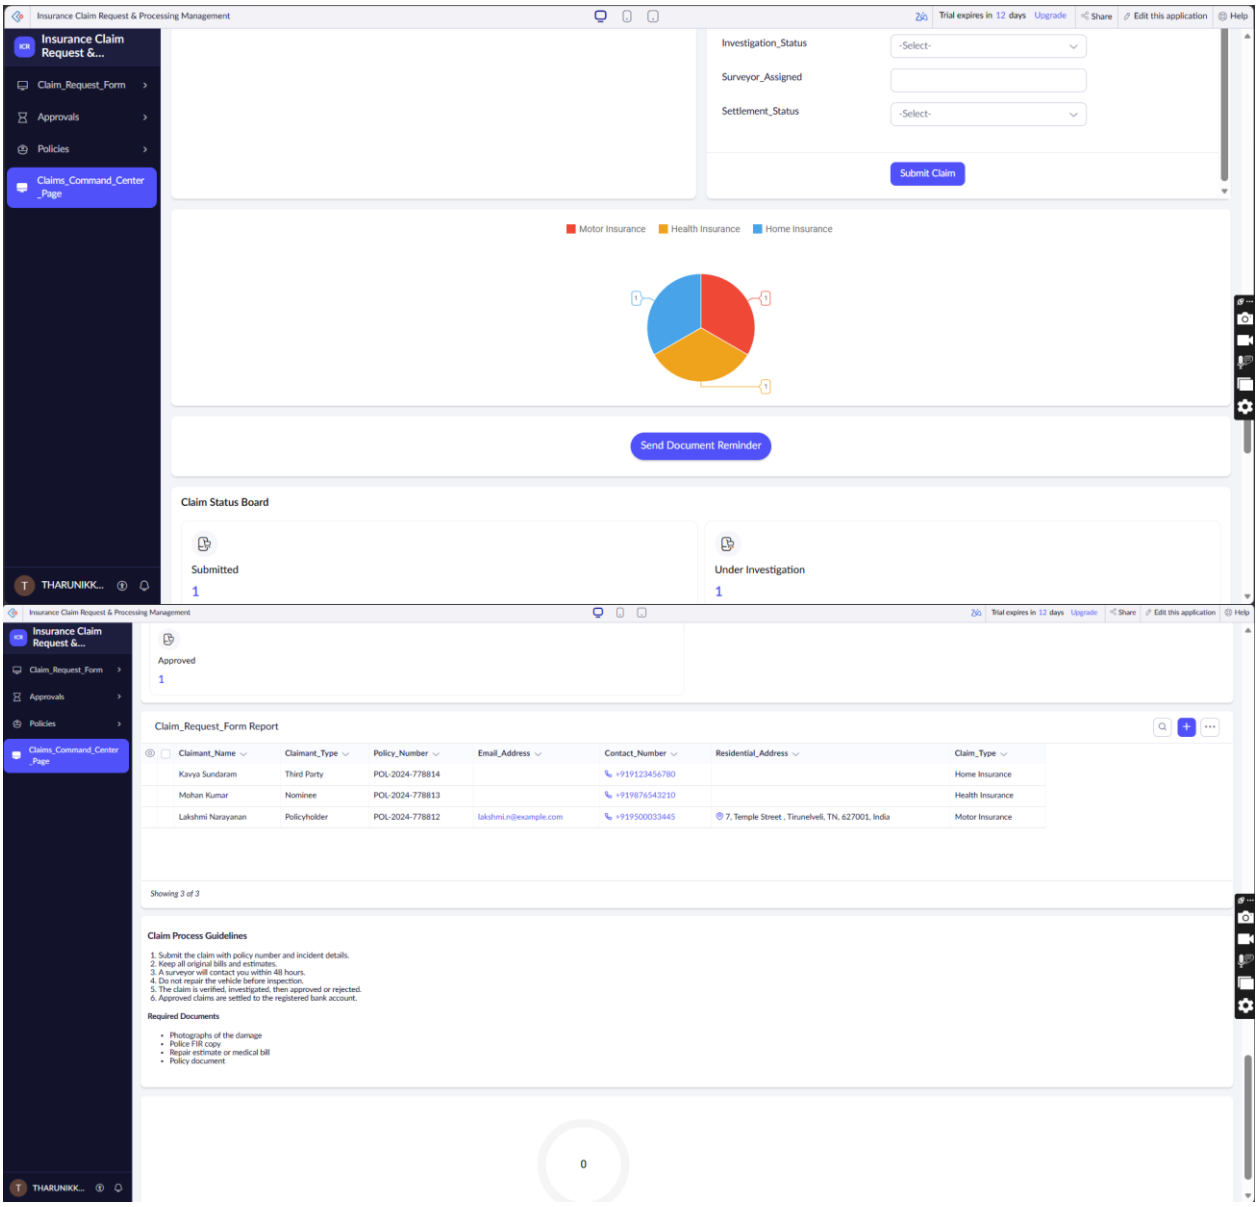

Figure 1: Page Builder with all elements

4. Result

The Claims_Command_Center_Page was built in Zoho Creator with the Page elements listed above. On the live page, the Chart, Board counts (Submitted 1, Under Investigation 1, Approved 1) and Gauge show the sample data, and the Search returns the matching claim.
